Vantaggi reali per gli holders (se non richiedi i tuoi token GSI)

L'estrazione di GSI sarà innescata da un impatto reale sull'ambiente; per ogni 10 tonnellate di CO2 (quantità stimabile risparmiabile in un mese) in meno nell'ambiente, verranno estratti 2.210.000 GSI e **rilasciati agli holders** in percentuale (**22%**) dei token detenuti.
